Funds Management

The Funds Management business supports new and emerging investment platforms through their launch and growth phases. Funds Management builds on Freeway Investment Company's success in Investment Management and supports the move towards a leader in alternative investing. Leveraging the Group's rich business heritage, global network, and strong financial position, Funds Management provides managers significant investment capital as well as operational and financial support to grow their portfolio. In addition, this platform gives investors access to multiple boutique fund managers through an institutional platform backed by a premier listed financial services company.

In recent years, the investment industry, and in turn investors, have introduced a new gauge: Freeway Investment - Environment, Social, and Governance - as a supplement to traditional financial gauges. Changes are happening faster than ever, reshaping how people live and invest. We believe that these factors are going increasingly mainstream and can be used to drive investment outperformance.

Investing for a Sustainable Future

The era of green bonds has arrived. We are seeing the increasing use of bond markets to raise capital to fund the low-carbon economy, especially from the issuance of 'green bonds'. While many in the fixed-income market are grappling with green bonds, others are working out how best to incorporate broader environmental, social, and governance strategies into their portfolios, a task rapidly growing in importance.

To make diversification work, an investment portfolio should include assets that are complementary, reacting differently to the same macro conditions. Some negative elements in the market might cause one asset to decline sharply but pose little threat to another. In the investment world, such pairs are called lowly-correlated assets, effectively balancing the risk and return of an investment portfolio.

Portfolio Management

In the investing journey, investors should start by constructing a portfolio that accommodates their investment objectives and risk profiles. However, setting up the initial asset allocation is just a starting point. It's equally important to regularly rebalance the portfolio to ensure consistent asset weightings. Overlooking the need to rebalance can prevent investors from achieving their long-term investment goals.

Market Changes Shift Portfolio Away from Initial Objective

In an investment portfolio, the relative weights of different asset classes may change due to market fluctuations, leading to a shifted asset allocation that deviates from the original target. Rebalancing the portfolio in this case means restoring the weightings of portfolio assets to the originally designed levels.

Hedge Funds and Private Equity

Freeway Investment Company's investments include externally managed private equity funds and hedge funds, as well as private equity direct and co-investments. The portfolio seeks to maximize risk-adjusted returns and diversify exposure by industry and geography, giving the company a global view of the alternative investment landscape.

Investment Management

Freeway Investment Company established the Investment Management division, formerly known as Principal Investments, evolving into a leader in alternative investing. Investment Management leverages the group's expertise, network, and financial strength to seek attractive risk-adjusted investment opportunities across global markets and sectors. This includes internally managed strategies, corporate holdings, and cash. They actively manage all sub-portfolios and use derivatives and hedging to increase returns and manage risk.

Hit Your Investment Targets with the Right Approach

Once you have identified your investment targets, you can allocate your cash across different asset classes and construct a portfolio based on your risk tolerance. Asset allocation involves including equities, bonds, and other investment tools in a basket, considering their different risk-return profiles.
